DETAILED ACTION

1. This Office Action is responsive to the after final filed November 20, 2006. Upon consideration of after final arguments submitted, Examiner has withdrawn finality of previous Office Action dated September 16, 2006. Claims 1-12 and 14-17 are pending in the application.

Allowable Subject Matter

2. Claims 1-12 and 14-17 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter:

Although prior art discloses a cannula retractable medical device to be used with a collection vial having a front pierceable stopper, a double-ended cannula with front and rear taper points, and a collection chamber to accommodate the collection vial, no prior art discloses having a cannula retractable medical device to be used with a collection vial having a barrel with a larger diameter wall portion and an inner barrel wall surface with deformable protrusions on the inner surface of the larger diameter wall portion, which extend inwardly to hold the collection vial in a frictional engagement along the axis forming a stable attachment for the collection vial and preventing possibly swaying of the collection vial during use while minimizing discomfort to the user.
